driving, hard launches and hard 1-2 shifts, the under supported rear subframe mounting points in the E46 M3 can fail. Thin sheet metal and a lack of reinforcement leads to small hairline cracks, torn welds and in the worst case scenario, the entire trunk floor can separate, ultimately leading to an extremely costly repair and a very dangerous car to drive.

BMW E46 M3 are known to wear issues with their rear differential and currently the only official solution is to replace the whole assembly at significant cost (£3,000+). If the issues are left unattended it can cause serious damage to the rear diff assembly so we would recommend overhauling the diff when it develops signs
