### Green Innovation in China | Columbia University Press

“ Green Innovation in China is a compelling exploration of how China is transforming itself into a clean energy powerhouse. This is a book that should be on the desk or nightstand of anyone who wants to understand where China’s leaders are taking their country and how they plan to get there.”

### Green Innovation in China | Joanna Lewis

This chapter examines China's rapid rise in the global wind power industry, despite the fact that the nation is the largest emitter of greenhouse gases and the world's single largest source of emissions. It briefly looks into how China is now succeeding at green innovation rather than just replicating technologies from elsewhere and manufacturing them inexpensively.

### Green Innovation in China - University Press Scholarship

1 Green Innovation in China (pp. 1-4) China’s energy system has significant global implications.
