### **Parkinsons Disease Theory And Practice For Nurses**

Parkinson&#x2019;s disease is the second most common neurodegenerative condition after Alzheimer&#x2019;s disease. The number of patients will rise dramatically due to ageing of the population and possibly also due to environmental issues. It is widely recognised that the current models of care for people with Parkinson&#x2019;s disease or a form of atypical parkinsonism lack continuity, are ...

### **Proactive and Integrated Management and Empowerment in ...**

The new theory proposes that Parkinson's disease may actually be a 'systemic condition' (that is, affecting cells everywhere at the same time), but the clinical features - such as motor issues - only appear as certain thresholds are passed in the affected populations of neurons in the brain.
