The number π (/ p aɪ /) is a mathematical constant. It is defined as the ratio of a circle's circumference to its diameter, and it also has various equivalent definitions. It appears in many formulas in all areas of mathematics and physics. It is approximately equal to 3.14159. It has been represented by the Greek letter " π " since the mid-18th century, and is spelled out as "pi".

Most recently, I published, with my son, Tom, a national best-seller book, *The China Study: Startling Implications for Diet, Weight Loss and Long Term Health* (2005), which includes much of what I intend to say in this blog post. It is there where you will find much of the evidence and rationale that support my views.

This factsheet discusses the common elements of the home study process and addresses some concerns that prospective adoptive parents may have about the process. Specific home study requirements and processes vary greatly from agency to agency, State to State, and (in the case of intercountry adoption) by the child's country of origin. They are also subject to change.
