[Critical Issues in the History of Spaceflight](#) Mar 18 2022 In March 2005, the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history. This volume is a collection of essays based on those deliberations. The meeting took place at a time of extraordinary transformation for NASA, stemming from the new Vision of Space Exploration announced by President George W. Bush in January 2004: to go to the Moon, Mars, and beyond. This Vision, in turn, stemmed from a deep reevaluation of NASA's goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board. The new goals were seen as initiating a "New Age of Exploration" and were placed in the context of the importance of exploration and discovery to the American experiences. (Amazon).

[New Employee Orientation Training](#) Mar 30 2023 A well-planned, comprehensive orientation program benefits both organizations and employees. Investing in new employees pays big dividends in performance, retention, and engagement. But does your training program cover the essentials of making new hires feel informed, prepared, and supported? Organization development authority and prominent trainer Karen Lawson has created comprehensive new employee orientation workshops to ensure organizational onboarding is done right for the benefit of all employees, regardless of job level or function. Her two-day, one-day, and half-day agendas include the resources trainers need to deliver practical, interactive sessions. Your workshop will help ensure that new employees integrate smoothly and effectively into their organization and its mission. You'll also find tools and checklists developed specifically for busy supervisors and managers who conduct orientation in their departments.

Soviet Space Mythologies Feb 26 2023 From the start, the Soviet human space program had an identity crisis. Were cosmonauts heroic pilots steering their craft through the dangers of space, or were they mere passengers riding safely aboard fully automated machines? Tensions between Soviet cosmonauts and space engineers were reflected not only in the internal development of the space program but also in Soviet propaganda that wavered between praising daring heroes and flawless technologies. Soviet Space Mythologies

explores the history of the Soviet human space program within a political and cultural context, giving particular attention to the two professional groups—space engineers and cosmonauts—who secretly built and publicly represented the program. Drawing on recent scholarship on memory and identity formation, this book shows how both the myths of Soviet official history and privately circulating counter-myths have served as instruments of collective memory and professional identity. These practices shaped the evolving cultural image of the space age in popular Soviet imagination. Soviet Space Mythologies provides a valuable resource for scholars and students of space history, history of technology, and Soviet (and post-Soviet) history.

[Draft Final Report of the Second Workshop on Shipboard Scientific Diving](#) Nov 25 2022

[Mine Planning and Equipment Selection 1995](#) Jan 28 2023 This text presents about 150 papers based on an international symposium on mine planning and equipment selection, held in Canada in 1995. Coverage includes: design and planning of surface and underground mines; surface mining and the environment; tailings disposal; and slope stability analysis.

[Screen Design Manual](#) Nov 13 2021 The Screen Design Manual provides designers of interactive media with a practical working guide for preparing and presenting information that is suitable for both their target groups and the media they are using. It highlights background information and relationships, clarifying them with examples, and encourages the further development of the language of digital media. In addition to the basics of perception and learning psychology, ergonomics, communication theory, imagery research, and aesthetics, the book also considers design navigation and orientation elements. Guidelines and checklists, along with the comprehensive design of the book, support the transfer of information into practice. Frank Thissen teaches multimedia didactics and information design at the University of Applied Sciences in Stuttgart. For over 10 years he has been developing computer based training. He has worked for international companies such as Siemens AG and SAP AG. His research project explores the role of emotion in e-learning > [www.frank-thissen.de](#) Key Topics: - Interactive media - Text for the screen - Effective use of pictures - Video, animation, and sound - Screen layout - Orientation and navigation - Interaction - Emotions and metessages - Intercultural communication

Follow-on Development of Structured Training for the Close Combat Tactical Trainer Jul 30 2020 "This report describes the

work done on the "Structured Training for Units in the Close Combat Tactical Trainer-2" (STRUCCTT-2) Project, a follow-on to the STRUCCTT Project. The purposes of this project were to (a) develop additional exercises for inclusion in the initial training support packages (TSPs) and (b) develop an orientation course TSP and exercises which are necessary to support the Close Combat Tactical Trainer (CCTT) complete system fielding. This report first summarizes the background (the use of structured simulation-based training in CCTT) and identifies the technical objectives for the project. The development section discusses the processes used to create the TSBs. The formative evaluation section details the project evaluation strategy and method and includes a description of exercise and TSP testing and modification. Following this segment, the lessons learned present issues regarding this project's processes and product development which provide insight and direction for additional development work. The final section of the report contains a discussion of recommendations for future TSP development."--Stinet.

[Developing the Reserve Component Virtual Training Program](#) Jun 20 2022 This report describes the development of the Reserve Component Virtual Training Program (RCVTP) for training U.S. Army National Guard (ARNG) armor-units using the simulation technologies of Simulation Networking (SIMNET), Janus, and an automated tactical operations center simulator called the Commander/Staff Trainer (C/ST). The report presents the project's background, including the conceptualization of the RCVTP by the contracting agency, the U.S. Army Research Institute for the Behavioral and Social Sciences (ARI), and the contractor team's proposal for operationalizing ARI's conceptualizations. Three of the major goals of the RCVTP are to emphasize execution, to compress training time, and to reduce training management by providing a turn-key program for the ARNG. The report summarizes the design and development of the RCVTP's platoon-, company-, and battalion-level exercises and their training management materials. Significant design issues discussed include identifying tasks appropriate for training in designated simulated environments and incorporating specified design concepts through the process of outlining the training exercises. The development of the exercises and the training management materials is discussed in light of their relationship to the design principles and in terms of their relevance to the final RCVTP product. The report describes the formative evaluation and presents findings in the context of the developmental framework Finally, the report documents the process of extending the

developmental methodology through the creation of cavalry troop exercises and identifies lessons learned. (AN).

[The Handbook of Human-Machine Interaction](#) Feb 14 2022 The Handbook of Human-Machine Interaction features 20 original chapters and a conclusion focusing on human-machine interaction (HMI) from analysis, design and evaluation perspectives. It offers a comprehensive range of principles, methods, techniques and tools to provide the reader with a clear knowledge of the current academic and industry practice and debate that define the field. The text considers physical, cognitive, social and emotional aspects and is illustrated by key application domains such as aerospace, automotive, medicine and defence. Above all, this volume is designed as a research guide that will both inform readers on the basics of human-machine interaction from academic and industrial perspectives and also provide a view ahead at the means through which human-centered designers, including engineers and human factors specialists, will attempt to design and develop human-machine systems. *Monthly Catalog of United States Government Publications* Sep 23 2022

[Salyut - The First Space Station](#) Mar 25 2020 This remarkable book gives a comprehensive account of the longest manned space mission of the time. It details for the first time the people involved and the crews assigned to operate the first space station Salyut. The book portrays the selection of the crews, dramatic flights and tragedy of Soyuz 11. Biographies of the Soyuz 11 cosmonauts are published for the first time in English. The book relates discussions between the key personnel, and investigates the causes of the tragedy. The book ends with memories of all those affected by the DOS program and the tragedy of Soyuz 11 and looks forward to a continuation of the historic mission of Salyut.

Creative Onboarding Programs: Tools for Energizing Your Orientation Program Apr 30 2023 Revised, expanded, and up-to-the-minute—the leading guide to serving the modern organization's onboarding needs It's a challenge overlooked by many: The need to bring recent hires into the fold, smoothly, effectively, and rapidly. And in this state-of-the-art multi-phased guide to integrating new employees into an organization, Doris Sims, longtime HR and onboarding guru again redefines the expectations of what effective HR training and succession management can do for your business. Fully updated with new case studies of best practices from successful companies, Creative Onboarding is the edge your business needs. The most complete resource for helping employees do their best work from the minute they first walk in the door, this book delivers an arsenal of high-end strategies and skills, including: Activities and checklists to help focus your onboarding efforts Advice on designing and implementing programs for employees at any level that mesh

with existing organizational cultures The latest tools, technologies that create programs with impact Ways to measure results-and make positive adjustments on the fly In today's hyper-competitive business environment, seamless onboarding is an absolute necessity. And Creative Onboarding puts within easy reach the benefits of improved retention and performance, along with drastically reduced HR-related overhead. Topics covered include: Designing New Employee Onboarding: Companies Who Do it Right • New Tools and Technologies to Make Your Program Fun and Memorable • Onboarding New Managers • Onboarding FAQs • and more

Ribald Tales Oct 01 2020 U'tapao, Thailand(U.T.) in the mid '60s, newest and closest B-52 base to Vietnam. Humorous tales of airmen at war while suffering a mild cultural shock. From whorehouse to briefing room; lover's bed to flying over Vietnam; from the hot, dusty base to steamy Bangkok, they adapted without losing sight of the mission. Irreverent, slapstick and often poignant stories in a war with 'rules'.

[Mir Hardware Heritage](#) Dec 23 2019 The heritage of the major Mir complex hardware elements is described. These elements include Soyuz-TM and Progress-M ; the Kvant, Kvant 2, and Kristall modules ; and the Mir base block. Configuration changes and major mission events of Salyut 6, Salyut 7, and Mir multiport space stations are described in detail for the period 1977-1994. A comparative chronology of U.S. and Soviet/Russian manned spaceflight is also given for that period. The 68 illustrations include comparative scale drawings of U.S. and Russian spacecraft as well as sequential drawings depicting missions and mission events.

[The Appropriation of Media in Everyday Life](#)

Mar 06 2021 Focuses on how people appropriate media in their daily lives. This book contributes to the burgeoning field of interactional linguistic media studies. It analyses the minutiae of the moment when people actively appropriate media for their own purposes in different fashions.

Marine Simulation and Ship

Manoeuvrability Jan 16 2022 Real-time, interactive ship simulators limped onto the scene, in the wake of flight simulators, some years ago. The maritime industries have a long history of conservatism, but this is now changing rapidly. The information age has also swept over ships and shipping, and has been taken to heart to such an extent that, for example, flight simulators now cooperate with ship simulators and import useful new concepts and methodologies. The more than 50 papers contained in this book show what and why. Although traditionally conservative, the marine world is also traditionally international and this has not changed. The papers in the book are by leading authors from all over the world and provide a detailed snap-shot of the rapidly

advancing state-of-the-art, together with pointers to the future. The overall theme of MARSIM '96 and therefore also of this book is: Vessel manoeuvrability and marine simulation research, training and assessment, and includes original papers on topics such as bridge resource management, distant learning and simulators coupled via The Internet, virtual reality, neural networks, rudder-propeller hydrodynamics, prime mover models, squat in shallow water, and many more.
