This new and exciting text is aimed at informal educators involved in youth work, community work and adult education and health promotion. The contributors explore the principles and practice of informal education and focus, in particular, on the notion of 'working with' which is central to practice, in this sector. The book argues for an approach which is relevant to a number of professional fields and which focuses on a way of working rather than upon a specific target group. The book looks at the role of an educator in informal education and youth work settings. Comprehensive and analytical, it looks at social, cultural and political contexts of education. The authors discuss the practical side of teaching from the setting, programme planning and communication to activity-based work, one-to-one case work, formal group work and managing the work load. Finally the book analyses developing professional practice, the use of line management and supervision, and evaluation of work. This classic work provides a richly textured overview of the "whys" and "hows" of brief therapy. The authors identify the central features of effective, time-limited interventions for individuals, couples, families, and groups. Taking a developmental approach to treatment, they explain how brief therapy can help at different times in a patient's life, as changes and transitions bring on new stresses and challenges. A practical framework is provided for selecting and screening patients, rapidly finding a focus for clinical work, and making optimal use of available time. Case examples and extensive transcripts are included to illustrate the use of strategies and techniques drawn from many different psychotherapy perspectives. Throughout, the focus is on creative and efficient ways to help patients build on existing strengths and make desired changes in their interactions with others.
