HDFC Bank 2.0 Dec 27 2022 FOREWORD BY NANDAN NILEKANI "Tamal combines his financial knowledge, eye for detail, and an excellent storytelling style to create a vivid portrait of India's most valued bank and its path to the future." NANDAN NILEKANI, Co-founder and Chairman of Infosys and Founding Chairman of UIDAI (Aadhaar) "Tamal has enthusiastically documented the epiphany that HDFC Bank's leadership had in starting out on their digital journey. India is set for seismic changes to day-to-day banking over the next few years and banks who don't commit to fully re-engineering their practice around becoming a technology company that delivers real-time, contextual banking experiences will wither on the vine. HDFC Bank has made a solid start on this journey, but the final chapter has not yet been written." BRETT KING, Founder, Moven and bestselling author of Bank 4.0 The seeds of change were sown in September 2014, when HDFC Bank MD Aditya Puri went to Silicon Valley to meet the brightest tech minds in the world. By the time he got back, he knew exactly what needed to be done. It was time for a revolution. Instead of waiting to be disrupted by fintech companies, HDFC Bank went all out to disrupt itself, recasting its role and scope on a scale that has never been attempted before. In one of the biggest transformations ever undertaken in any business, HDFC Bank wants to become a platform facilitating a financial experience. Tamal Bandyopadhyay chronicles HDFC Bank's own digital disruption exercise through the very people who drove it, narrating a story that's as compelling as unique in India's financial system. With his keen eye for detail, deep knowledge of banking and unparalleled storytelling ability, Bandyopadhyay recounts the journey of India's most valued lender from a life cycle bank to a lifestyle bank. TAMAL BANDYOPADHYAY is a bestselling author, award-winning columnist and a keen observer of the Indian banking sector for over two decades.

Negotiating with Terrorists Dec 15 2021 This edited volume addresses the important issue of negotiating with terrorists, and offers recommendations for best practice and processes. Hostage negotiation is the process of trying to align two often completely polarised parties. Authorities view hostage taking as unacceptable demands made by unacceptable means. However terrorists view their actions as completely justified, even on moral and religious grounds. If they are to try and reconcile these two sides, it is essential for hostage negotiators to understand terrorist culture, the hostage takers' profiles, their personality, their view of the world and also the authorities, their values and their framing of the problem raised by the taking of hostages. Although not advocating negotiating with terrorists, the volume seeks to analyse when, why, and how it is done. Part I deals with the theory and quantifiable data produced from analysis of hostage situations, while Part II explores several high profile case studies and the lessons that can be learnt from them. This volume will be of great interest to students of terrorism studies, conflict management, negotiation, security studies and IR in general. I William Zartman is the Jacob Blaustein Distinguished Professor Emeritus of International Organization and Conflict Resolution and former Director of the Conflict Management and African Studies Programs, at the Paul H. Nitze School of Advanced International Studies, Johns Hopkins University, Washington, DC. He is a member of the Steering Committee of the Processes of International Negotiation (PIN) Program at the International Institute of Applied Systems Analysis (IIASA) in Laxenburg, Austria. He is author/editor of over 20 books on negotiation, conflict and mediation. Guy Olivier Faure is Professor of Sociology at the Sorbonne University, Paris I, and a member of the Steering Committee of the Processes of International Negotiation (PIN) Program at the International Institute of Applied Systems Analysis (IIASA) in Laxenburg, Austria. The children are told that some cherries (their favourite noodles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there is usually another group of kids ready to fall for it! They excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this book are like those noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!

A State Built on Sand Nov 13 2021 Oscillations in opium poppy production in Afghanistan have long been associated with how the state was perceived, such as after the Taliban imposed a cultivation ban in 2000-1. The international community's subsequent attempts to regulate opium poppy became intimately linked with its own state-building project, and rising levels of cultivation were cited as evidence of failure by those international donors who spearheaded development in poppy-growing provinces like Helmand, Nangarhar and Kandahar. Mansfield's book examines why drug control - particularly opium bans - have been imposed in Afghanistan; he documents the actors involved; and he scrutinizes how prohibition served

divergent and competing interests. Drawing on almost two decades of fieldwork in rural areas, he explains how these bans affected farming communities, and how prohibition endured in some areas while in others opium production bans undermined livelihoods and destabilized the political order, fuelling violence and rural rebellion. Above all this book challenges how we have come to understand political power in rural Afghanistan. Far from being the passive recipients of violence by state and non-state actors, Mansfield highlights the role that rural communities have played in shaping the political terrain, including establishing the conditions under which they could persist with opium production.

Resilient Organizations Feb 26 2023 Recent financial crises have shown that firms need to create more robust business models. However, it seems that the task of developing resilience - a firm's ability to adapt, endure, bounce back and then thrive, despite the shock - appears on most managers' strategic issue list only after such a shock has occurred. Managers, through responsible leadership, can make explicit choices that will enhance their firm's resilience, increasing their chances of anticipating and avoiding these shocks. This book is the result of a three-year research project across seven industries, and is aimed at improving the understanding of why some firms are better than others in dealing with market turbulence. Pirotti and Venzin develop a measure for organizational resilience, identifying resilience drivers and demonstrating how firms can appropriate value from high resilience levels. It is a valuable read for graduates taking a course in strategy and global management and for reflective practitioners.
