The Cambridge History of Black and Asian British Writing provides a comprehensive historical overview of the diverse literary traditions impacting on this field's evolution, from the eighteenth century to the present. Drawing on the expertise of over forty international experts, this book gathers innovative scholarship to look forward to new readings and perspectives, while also focusing on undervalued writers, texts, and research areas. Creating new pathways to engage with the naming of a field that has often been contested, readings of literary texts are interwoven throughout with key political, social, and material contexts. In making visible the diverse influences constituting past and contemporary British literary culture, this Cambridge History makes a unique contribution to British, Commonwealth, postcolonial, transnational, diasporic, and global literary studies, serving both as one of the first major reference works to cover four centuries of black and Asian British literary history and as a compass for future scholarship. 'Ayesha Jalal's book is an important scholarly account of ... the partition of India in 1947.' *American Historical Review* **Unlock the Hidden Powers of Your Mind** These secret principles of genius have been hidden, lost, or even forgotten through time. They have played a critical role in the greatest achievements of humanity, yet most of us are unaware of them. Now, they are finally revealed. Internationally bestselling author I. C. Robledo has profiled the brightest minds to demonstrate why these secret principles are so important. Their lives range from time periods that span millennia and include a wide range of cultures, professions, and personalities. We will explore the intellect of icons such as Leonardo da Vinci, Albert Einstein, Wolfgang Amadeus Mozart, Maria Montessori, and Sun Tzu. An important theme is that brilliant people have used these principles to accomplish what no one thought was possible. When everyone said "No", they still found a way to make it happen. What has become clear through the ages is that with the right principles, it is possible to tap into a potential that is limitless. **Discover the Secret Principles Which Changed the Following Lives - Leonardo da Vinci, the Renaissance man who gave us the Mona Lisa and was so committed to learning the human form that he dissected cadavers - Dr. Ben Carson, who grew up in a Detroit ghetto, yet he gained notoriety as a neurosurgeon for separating conjoined twins**

successfully - Wolfgang Mozart, and the secret principle which played a major role in his incredible rise to stardom in the classical music scene - Sun Tzu, whose timeless military wisdom has been applied in countless battles and beyond to business, law, and chess - The late musical artist Prince, who played 27 musical instruments and had no tolerance for low standards - Maria Montessori, who was ages ahead of her time with her revolutionary system for educating children - Ben Underwood, a boy who learned to "see" the world despite having his eyes removed because of retinal cancer - Many more brilliant minds and lives, and the secret principles they applied are discussed inside... Salvation is the ultimate ambition of the vast majority of the world's most dominant religions. I have researched thirty-one religions that represent the vast majority of the religions of the world. From Christianity that represents one-third of the global religious community, to Judaism that represents a mere minute fraction of a percent. Rituals and beliefs change, but the ultimate spiritual goal remains the same, appeasing their Supreme Being and finding eternal piece. I found that all the various different beliefs, rituals, and traditions end up being different roads that lead to the same location, salvation. The details of the thirty-one most popular and main religions of the world are disused and analyzed. The religions are among the world's main religious denominations, thereby covering the vast majority of the planet's religious beliefs.

A rare, searing portrayal of the future of climate change in South Asia. A streetrat turned revolutionary and the disillusioned hacker son of a politician try to take down a ruthlessly technocratic government that sacrifices its poorest citizens to build its utopia. The South Asian Province is split in two. Uplanders lead luxurious lives inside a climate-controlled biodome, dependent on technology and gene therapy to keep them healthy and youthful forever. Outside, the poor and forgotten scrape by with discarded black-market robotics, a society of poverty-stricken cyborgs struggling to survive in slums threatened by rising sea levels, unbreathable air, and deadly superbugs. Ashiva works for the Red Hand, an underground network of revolutionaries fighting the government, which is run by a merciless computer algorithm that dictates every citizen's fate. She's a smuggler with the best robotic arm and cybernetic enhancements the slums can offer, and her cargo includes the most vulnerable of the city's abandoned children. When Ashiva crosses paths with the brilliant hacker Riz-Ali, a privileged Uplander who finds himself embroiled in the Red Hand's dangerous activities, they uncover a horrifying conspiracy that the government will do anything to bury. From armed guardians kidnapping children to massive robots flattening the slums, to a pandemic that threatens to sweep through the city like wildfire, Ashiva and Riz-Ali will have to put aside their differences in order to fight the system and save the communities they love from destruction.

A survey of the state of human freedom around the world investigates such crucial indicators as the status of civil and political liberties and provides individual country reports. The security relationship between India and Pakistan is generally viewed through a neo-realist lens. This book explains the rivalry of these countries by looking at the socio-cultural norms at two levels, and discusses a hypothetical security community that could result in peace in the region. It is seldom that a human sees oneself as a small fraction of the infinite whole. As thinkers, we have often wondered why we have been born as an Indian or as an Indo-Mauritian (Mauritian of Indian origin), whose ancestors were from the Indian subcontinent. Obviously, if we study our genomes, we will see similar DNA molecules and gene pools. Although Indians and Indo-Mauritians have moved on in terms of cultural transformation, religious growth, educational achievements, and so on, we cannot forget our ancestry, which probably has given us our drives, the substance for our dreams. Our

ancestry is like our shadow. We cannot prosper and achieve success if we forget our roots and if we are afraid of our shadows. For, we are people of the New Jerusalem -- who are the seed of Lord Sanat Kumara. As Mark Twain rightly said that, "India is the cradle of the human race, the birthplace of human speech, the mother of history, the grandmother of legend and the great grandmother of tradition". The original name of India is Bharata ('Bha' means light and 'rata' means absorbed) which means the motherland where people have opportunity and privilege to be absorbed into 'the Light of Truth'. This journey is certainly not about Indians or Mauritians, but a scientific exploration of the mystical paths traversed by our ancestors in search of this 'Light of Truth', some of whom were gurus, saints, monks, yogis and spiritual masters. And what they unearthed or unveiled about this 'Mirror of Truth' by labouring and toiling through the faculties of their body, speech and mind. For man as a centaur is a conditioned man, while the man on the horse, like a true horse-rider, is a liberated man. The former is less evolved and the latter is more evolved. A state-of-the-art, one-stop resource, *Public Administration in South Asia: India, Bangladesh, and Pakistan* examines public administration issues and advances in the Indian subcontinent. The book fulfills a critical need. These nations have the largest public administration programs in South Asia, yet existing knowledge on them is fragmented at best. Bringing together leading scholars from these countries, this book provides both an insider perspective and a scholarly look at the challenges and accomplishments in the region. Focusing on the machinery of government, the book explores questions such as: What is the history of public administration development? How are major decisions made in the agencies? Why are anti-corruption efforts so much a challenge? What is the significance of intergovernmental relations? What is the success of administrative reform? What are examples of successful social development programs? How successful is e-government, and what are its challenges? Why is civil service reform difficult to achieve? How is freedom of information being used as a means to combat corruption and invoke grassroots activism? What can be learned from the successes and failures? While public administration practice and education have become considerably professionalized in the last decade, a sufficiently in-depth and well-rounded reference on public administration in these countries is sorely lacking. Most available books tackle only aspects of public administration such as administrative reforms, civil service, economic developments, or public policy, and are country specific. None provide the in-depth analysis of the sphere of public action in South Asia found in this book. It supplies an understanding of how public administration can be either the source of, or solution to, so many of the problems and achievements in the Indian subcontinent. "Discusses the fundamental assumptions regarding the foundations of Pakistani nationalism as well as our current understanding of the roots of its postcolonial identity crisis"-- *Marxism in India* deals with the evolution, growth, struggle for survival, and reasons for failure of this ideology in India. Kiran Maitra analyses the challenges that have beleaguered marxism in our country in the last eight decades - flawed advice from abroad, challenges from within the country, and the incapacity of the marxists themselves. Given the contemporary political scenario in the country it is struggling for mere survival through means and methods, often in total disregard of the tenets of marxism. During the darkest hours of World War II, a Scarsdale, NY, high school student experienced a "vision" of the possibilities of a peaceful postwar world. From this mystical moment came the most powerful American student movement of the postwar decade—the Student Federalists—who pressed their elders and their contemporaries to consider the establishment of a world government based on the same principles which guided our nation's Founding Fathers more than a century-and-a-half earlier. Damned by the fanatics of the extreme right, and of the extreme left, the

Student Federalists rapidly expanded after VJ Day, reaching a high point of some 15,000 members and almost four hundred local chapters. No student movement ever grew as fast and as broadly as the Student Federalist between 1943 and 1949. Nor did any fade as precipitously in the face of a widening Cold War. Few other American movements have produced so many future leaders in academia, politics, international aid and public affairs as did this non-partisan and non-sectarian phenomenon. This story—never told before—is documented by the correspondence, proceedings and news articles of the student participants and includes a 150-page appendix containing scores of documents, essays, statements of purpose, and official pamphlets. This volume introduces Islam for "westerners who seek to understand Islam on a personal level." The author wrote this as his response to the claim that secular democracy and capitalism are the pinnacle of civilization. The book caused a public scandal when it first appeared in Europe because of people's shock that the author, a German, had accepted Islam. His stated primary objective is to build bridges between Islam and the West. Mohammad Ali Jinnah has been both celebrated and reviled for his role in the Partition of India, and the controversies surrounding his actions have only increased in the seven decades and more since his death. Ishtiaq Ahmed places Jinnah's actions under intense scrutiny to ascertain the Quaid-i-Azam's successes and failures and the meaning and significance of his legacy. Using a wealth of contemporary records and archival material, Dr Ahmed traces Jinnah's journey from Indian nationalist to Muslim communitarian, and from a Muslim nationalist to, finally, Pakistan's all-powerful head of state. How did the ambassador of Hindu-Muslim unity become the inflexible votary of the two-nation theory? Did Jinnah envision Pakistan as a theocratic state? What was his position on Gandhi and federalism? Asking these crucial questions against the backdrop of the turbulent struggle against colonialism, this book is a path-breaking examination of one of the most controversial figures of the twentieth century. In the middle of August, 1947, two nations - the Dominion of India and the Dominion of Pakistan - came into being through a Partition of the British Indian Empire. The Princely States, which owed their existence to the British, acceded to either of the two Dominions. Jinnah, as Governor-General of Pakistan, and Nehru, as Prime Minister of India, took the oath of office swearing allegiance to George VI, who was still the King of both the Dominions but no longer the Rex Imperator or King-Emperor. The Dominions eventually emerged as the Republic of India in 1950 and the Islamic Republic of Pakistan in 1956. Twenty-five years on, in 1972, a third country - the People's Republic of Bangladesh - was born out of the liquidation of East Pakistan. A United India - if it had been preserved - may have been an equal, militarily and economically, of the People's Republic of China. Arun Bhatnagar's Book is an engaging and absorbing account of a Subcontinent that passed through the High Noon of Empire, saw unity dissolving into division and experienced euphoria and despair, progress and tragedy, victory and defeat. The narrative, during the years 1911-1999, traverses (by way of the life-story of an Indian member of the ICS, later a practicing Barrister and Politician) various dimensions of history, politics, economy, culture and administration. The Afterword conveys the reader into the twenty-first century when unfriendly neighbours are in alliance to thwart New Delhi's interests. Takes A Fresh Book At The Process Of Development Particularly In India, Pakistan And Bangladesh. Analyses The Current Economic, Political And Social Realities In These Countries. Opines That Despite Some Changes These Societies Have Modernised. Has Eight Chapters Ending With Conclusions. Well-known Africanist Suzanne Miers places modern slavery in its historical context, tracing the phenomenal development of the international anti-slavery movement over the last hundred years. She demonstrates how the problems of eradication seem greater and more intractable today than they had ever been with the expansion of slaving

to include forced labor, prostitution, and the exploitation of children. Her book will be a valuable resource for readers interested in world history, slavery, human rights, race and ethnic studies, labor and the world economy, and international relations. Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 194 countries and 14 territories are used by policymakers, the media, international corporations, civic activists, and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Articles, previously published in Indian and foreign review, English semimonthly. Freedom in the World contains both comparative ratings and written narratives and is now the standard reference work for measuring the progress and decline in political rights and civil liberties on a global basis. The Comparative Survey of Freedom is an institutional effort by Freedom House to monitor the progress and decline of political rights and civil liberties in 191 nations and 59 related territories. These year-end reviews of freedom began in 1955, when they were called the Balance Sheet of Freedom and, still later, the Annual Survey of the Progress of Freedom. This program was expanded in the early 1970s, and has appeared in Freedom Review since 1973. It has also been issued in a more developed context as a yearbook since 1978. Since 1989, the Survey project has been a year-long effort produced by regional experts, consultants and human rights specialists. The Survey derives its information from a wide range of sources. Most valued of these are the many human rights activists, journalists, editors and political figures around the world who keep us informed of the human rights situation in their countries. Throughout the year. Freedom House personnel regularly conduct fact-finding missions to gain more in-depth knowledge of the vast political transformations affecting our world. During these week-to-month-long investigations, we make every effort to meet a cross-section of political parties and associations, human rights monitors, religious figures, representatives of both the private sector and trade union movement, academics and journalists. During the past year. Freedom House staff traveled to numerous countries throughout most of the world's geographical and political regions. The Survey project team also consults a vast array of published source materials, ranging from the reports of other human rights organizations to often rare, regional newspapers and magazines. This year's Survey team includes: Adrian Karatnycky, Martin Edwin Anderson, Kristen Guida, Marshall Freeman Harris, Thomas R. Lansner, Arch Puddington, Leonard R. Sussman, and George Zarycky. The general editor of Freedom in the World is Roger Kaplan; the managing editor is Tara Kelly. This year's research coordinator was Charles Graybow. Academic freedom—the institutional autonomy of scientific, research and teaching institutions, and the freedom of individual scholars and researchers to pursue controversial research and publish controversial opinions—is a cornerstone of any free society. Today this freedom is under attack from the state in many countries—Russia, Turkey, Venezuela, Hungary, China—but it is also under question from within academe. Bitter disputes have erupted on American campuses, for example, about the limits of free speech and about whether liberal academic freedoms have degenerated into a form of coercive political correctness. Beyond the academy itself, among the general public, academic freedom is contested ground. As Robert Post of Yale Law School has put it, academic freedom is "the price the public must pay in return for the social good of advancing knowledge." Populist currents of political opinion are questioning the price a society pays for the freedom of its 'experts' and professors. Ruskin Bond's life - and, for that matter, his semi-autobiographical works - are allegories of the colonial aftermath. His is an odd but exemplary attempt at absorption as a member of the Anglo-Indian ethnic minority, a community whose role in

the shaping of the postcolonial Indian psyche has yet to be systematically analysed. This study explores the dialogue between the biographical and authorial selves of Ruskin Bond, whose subjectivity is informed by the fantasies of space and time. This handbook presents an authoritative account of the development of movements, thoughts and policies of OBCs (Other Backward Classes) in India. Despite the adoption of egalitarian principles in the Indian Constitution, caste inequalities, discrimination and exclusionary practices against people from backward classes and other lower castes continue to haunt them in contemporary India. A comprehensive work on the politics of identity and plurality of experiences of OBCs in India, this handbook: — Features in-depth research by eminent scholars on the Other Backward Classes (OBC) social and political thought, OBC movements and OBC development and policy making. — Discusses the life, ideologies and pioneering contributions by Gautam Buddha, Sant Kabir, Jotirao Phule, Savitribai Phule, Shahu Maharaj, Narayana Guru, B.R. Ambedkar, Ram Manohar Lohia, and E V Ramasamy Periyar and leading social reform movements. — Examines OBC issues with case studies from various Indian states to look at issues of pre- and post- Mandal India; backward caste movements; and reclamation of the Bahujan legacy. — Critiques public policies and programs for the development of OBCs in India. — Reviews the status of Muslim OBCs in India and of the invisibilized nomadic communities. — Reviews the impact of globalization on the economically backward lower castes and the impact of development initiatives for the excluded people. The first of its kind, this handbook will be essential reading for scholars and researchers of exclusion and discrimination studies, diversity and inclusion studies, Global South studies, affirmative action, sociology, Indian political history, Dalit studies, political sociology, public policy, development studies and political studies.

Muhammad Ali Jinnah, 1876-1948, Statesman and founder of Pakistan. A reappraisal of the tumultuous Partition and how it ignited long-standing animosities between India and Pakistan This new edition of Yasmin Khan's reappraisal of the tumultuous India-Pakistan Partition features an introduction reflecting on the latest research and on ways in which commemoration of the Partition has changed, and considers the Partition in light of the current refugee crisis. Reviews of the first edition: "A riveting book on this terrible story."—Economist "Unsparring. . . . Provocative and painful."—Times (London) "Many histories of Partition focus solely on the elite policy makers. Yasmin Khan's empathetic account gives a great insight into the hopes, dreams, and fears of the millions affected by it."—Owen Bennett Jones, BBC This book explores the meanings and complexities of India's experience of transition from colonial to the post-colonial period. It focuses on the first five years - from independence on 15th August 1947 to the first general election in January 1952 - in the politics of West Bengal, the new Indian province that was created as a result of the Partition. The author, a specialist on the history of modern India, discusses what freedom actually meant to various individuals, communities and political parties, how they responded to it, how they extended its meaning and how in their anxiety to confront the realities of free India, they began to invent new enemies of their newly acquired freedom. By emphasising the representations of popular mentality rather than the institutional changes brought in by the process of decolonization, he draws attention to other concerns and anxieties that were related to the problems of coming to terms with the newly achieved freedom and the responsibility of devising independent rules of governance that would suit the historic needs of a pluralist nation. Decolonization in South Asia analyses the transitional politics of West Bengal in light of recent developments in postcolonial theory on nationalism, treating the 'nation' as a space for contestation, rather than a natural breeding ground for homogeneity in the complex political scenario of post-independence India. It will appeal to academics interested in political science, sociology, social anthropology and

cultural and Asian studies. This Is A Painstakingly Researched And Passionately Written Account Of The Ideas And Movements That Constitute The Indian Muslimæ's Experiences Over The Last Two Centuries. Divided Into Five Sections, The Book Analyses The Complex Processes Of Identity Formation, The Politicization Of Islam, And The Demand For A Separate Muslim Nation. Based Upon The Most Reliable And Up To Date Research And Interpretation, This Book Is An Indispensable Reference For Students Of Islam, Modernism, And Civilizational Encounters In General And Indian History And Nationalism In Particular.
